Varieties of Special Merit

Nephrolepis Bostoniensis (The Boston Fern).

2 1/4-inch pots, 60 cts. per doz.; \$4.00 per 100; \$35.00 per 1000.
6-inch pots, 50 cts. each.
10-inch pans, \$2.00 each.

Nephrolepis Elegantissima Compacta.

A dwarf, compact form of N. Elegantissima, forming a dense, bushy, compact plant of ideal shape; a valuable addition to this class. Strong plants from 2 1/4-inch pots, \$2.00 per dozen; \$15.00 per 100.

Nephrolepis Giatrasii.

This variety introduced last fall in a very limited way, has proven to be a gem, especially where a perfect specimen is required in a small size. It will develop beautifully in a three, four or five-inch pot, making an ideal plant for many purposes where the other varieties of Nephrolepis are too coarse; grown in a 2 1/4-inch pot it will prove valuable for Fern-dish work. While it is a direct sport from the Boston Fern, to call it a miniature form of Scottii will convey a better idea of its appearance. 2 1/4-inch pots, \$2.00 per doz.; \$12.00 per 100; \$100.00 per 1000.

Nephrolepis Scholzei (Crested Scott Fern).

This variety was offered by us for the first time last year, and has met with full favor and has made a permanent place for itself. It is the ideal crested Fern, holding the same position to all other crested varieties that Scottii holds to the old Boston. It is a sport from Scottii, possessing all the merits of that most popular variety, but with the pinnae sub-divided, giving it a neat crested appearance. The fronds, like in Scottii, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance as is so often the case with all other crested forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air, prevents the centre of even the largest specimen from becoming defective or yellow, which is one of the weak points of all of its predecessors.

2 1/4-inch pots, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.
4 " " " 3.50 " 25.00 " "

Nephrolepis Scottii (The Scott Fern).

6 " " " 50 cts. each
10-inch pans, \$2.00 each.

Nephrolepis Superbissima.

(Introduction of 1908.)

Entirely distinct from all other crested forms, the fronds being heavily imbricated with the pinnae overlapping, making them very dense and compact. In color it is of a rich, dark green, of sturdy habit; and the fronds being firm and rigid, never break down.

We offer strong plants from

Adiantum Croweanum.

We are the sole distributors of Mr. Crowe's stock of this valuable fern.

This is not only the best and most profitable Maiden-hair to grow for cutting, but it is also the best variety to recommend to the retail buyers for house culture, it standing the dry atmosphere of the room better than any variety we have yet tried.

Strong, 3-inch pots, \$2.00 per dozen; \$15.00 per 100; \$140.00 per 1000.

Adiantum Hybridum.

Similar in general style to Croweanum and by some growers preferred. We consider it a good second.

Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of Summer flowering plants, and we are prepared to furnish many of the rarer as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox.

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice.

Price: Any of the above three new varieties \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.
